FOLKTALE

Mullah Nasruddin and the People's Judgement

One day, Mullah Nasruddin and his son were travelling to the next town. Nasruddin preferred to walk while his son rode the donkey. On the way, they passed a group of bystanders, and a man remarked, "Look, that selfish boy is riding on a donkey while his poor old father is forced to walk alongside. That is so disrespectful. What a horrible and spoiled child!"

Nasruddin's son felt embarrassed, so he got off the donkey and asked Nasruddin to get on it instead. His son started walking beside him and the donkey. Soon they passed another group of people. "Oh, that's detestable!" one of them exclaimed. "That poor young boy has to walk while his abusive father rides the donkey! That horrible man should be ashamed of himself for the way he's treating his son. What a heartless parent!"

Nasruddin was upset to hear this. He wanted to avoid anybody else's scorn, so he decided to have both himself and his son ride the donkey at the same time. As they both rode, they passed another group of people. "That man and his son are so cruel," one bystander said. "Just look at how they are forcing that poor donkey to bear the weight of two people. They should be put in jail for their despicable act. What scoundrels!"

Nasruddin heard this and told his son,
"I guess the only way we can avoid being ridiculed by anyone, is for both of us to walk."

"I suppose you are right," the son replied.

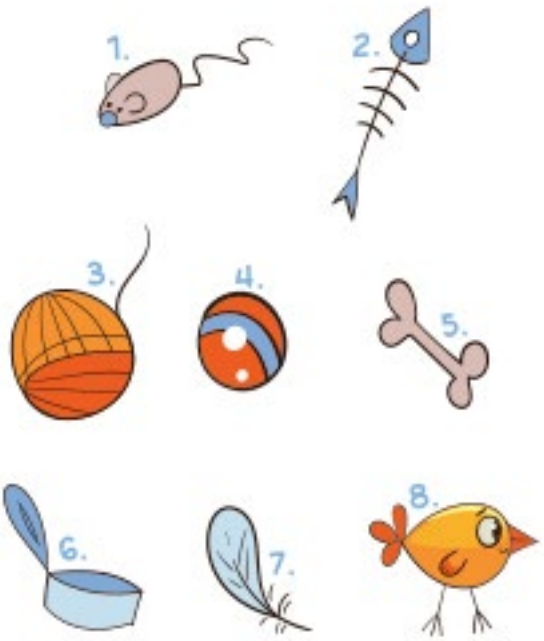

So they got off the donkey and continued on foot. But as they passed another group of people, they heard them laughing. "Ha, ha, ha," the group laughed rudely. "Look at those two fools. They are so stupid that both of them are walking under this scorching hot sun and neither of them is riding the donkey! What morons!"

Moral – Well, If you keep doing what other people want, neither would you be happy nor will they stop judging you.

SOME INTERESTING FACTS ABOUT AJANTA

The Ajanta caves in Maharashtra are an Indian national heritage site that are recognized as one of the world's greatest historical monument by UNESCO. There are 29 caves in Ajanta, with most of them being monasteries!

History of the Ajanta Caves

Discovered in AD 1819, the caves in Ajanta were built sometime around the 2nd Century, out of a horseshoe-shaped cliff along the Waghora River.

Interesting Facts about the Ajanta Caves

The caves are numbered in order from east to west.The caves 9, 10, 19, 26 and 29 were what are called "chaitya-grihas", meaning prayer halls. The rest of the caves were monasteries.

These caves are full of beautiful art, in the form of sculptures and paintings.

All the paintings depict the life and times of the great Gautama Buddha. They also speak of the various Bodhisattva's and tales from the Jataka's. Although the story of Buddha has many compositions, from Roman and Greek to Chinese, a majority of the story told here is from a phase that is purely Indian, and cannot be found anywhere else.

Why can't we tickle ourself?

When you're tickled, you laugh, which is indeed a joyful and refreshing feeling. But why it fails to happen when we touch our self?

Touch is an extremely sensitive feeling. When you're touched, the nerve beneath your skin passes an amusing current to your brain which tells us to laugh. Such sweet tickle attacks takes place only in the sensitive portions of our body such as stomach, portion near the throat and under our feet.

Basically, when we tickle ourselves, the cerebellum sitting at the back of the brain tells you that you are about to self-tickle and so the it doesn't waste up precious time interpreting the signals from the tickle.
Gorillas and rats do laugh when they are tickled, but do it at your own risk.

Keep your room clean and organised!

We all have days when we feel a little dis – organised. But sometimes a few days of being dis–organised can become a bad habit. Soon, we start becoming messy, and start creating a messy environment around us. We misplace things or even allow them to get spoilt. What do you think? Would you like to visit a friend's house and see a messy room. An unkempt bed, leftover food, or all their books all over the place. Obviously, no!

So let's keep our rooms organised and clean. Because we like coming back to a clean room!

EARTH

FACTS

Earth is the third planet from the Sun, in the Solar System.
The other names of The Earth are The World or The Blue Planet.

ERDA

Earth has been named from the 8th century Anglo Saxon word "erda" meaning soil.

SHAPE

Earth is not totally round. It is flattened at the North and South poles.

5 BILLION YEARS

Earth is about 5 billion years old!

7 BILLION PEOPLE

There are more than seven billion people on Earth and the number keeps increasing every day.

70% WATER

Seventy percent of the Earth is water!

11% CROPS

Eleven percent of the earth's ground is used to grow crops.

10% ICE

Ten percent of the Earth's surface is ice.

1/5 DESERT

One fifth of the Earth's land surface is covered with deserts.

TEMPERATURE

The temperature at the Earth's core is hotter than the temperature of the surface of the Sun, at 7500K

ATMOSPHERE

77% NITROGEN

21% OXYGEN

TThe Earth's atmosphere is composed of nitrogen (77%), oxygen (21%) and other gases like carbon dioxide and argon.

STARY FACTS

Earth was initially just composed of hydrogen and helium.

Particles from broken stars fell on the Earth and allowed for life on Earth. 40,000 dust particles from stars land on Earth every year.

We are made of stars!

SOLIDS + LIQUIDS + GASES

The Earth is the only planet on the Solar System to have the three forms of water-liquid, gas and solid.

8.5 MINS

It takes 8.5 minutes for the sunlight to reach Earth.

333,000 TIMES

The sun is 333,000 times larger than Earth.

A DAY

A day on Earth is 23 hours, 56 minutes and four seconds.

CONTINENTS

About 270 million years ago, a continent called Pangaea was formed on Earth. Today we have 7 continents.

23 DEGREES

The Earth's axis is tilted at an angle of 23 degrees leading to us experiencing four seasons in a year.

22 APRIL

EARTH DAY

Earth Day is celebrated on 22nd April, as that is the day when spring starts in the Northern Hemisphere and fall starts in the Southern Hemisphere.

JOJO

a comic story

She opened her eyes slowly, yawning loudly to shake off sleep. She turned to her alarm clock and looked at the time, it was 2 minutes to 7. Any moment now, she knew her mother would come through the door to wake her up. She heard a knock at the door and it slowly swung open. There stood a robot, holding her ironed school uniform. Wait, what was going on?
